

DESIGN HISTORY FILE

Project No: A539
Project Description: ASR II

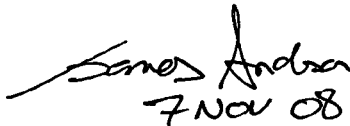

Project cancellation

The project was taken to point of Phase I review. In light of new literature, the business case for the project could no longer be justified and it was decided to halt development of the ASR II / ALPHA cup.

The paperwork in this DHF reflects that shown at the design input review (see document 13.2.1 stored in section 3.1 of this DHF) held on 5th September 2008.

The electronic documents have been partially updated but should be compared to this review before final sign-off.

A handwritten signature in black ink, appearing to read 'James Anderson', with the date '7 Nov 08' written below it.

James Anderson
Senior Bioengineer
